

Oct. 3, 2019

Good Morning Council Persons ;

I am here not for just myself, but for all the St. Paul Residents that think & care about being GREEN... I compost vegetable waste & yard waste, I recycle hazardous waste and all recyclables and plastic bags. I have minimum amount of trash, usually less than a half kitchen bag a week... therefore, my need for trash pick up is once every 4 to 6 weeks.

There are many one person households in St. Paul, that, like myself would like to have trash pick up only once a month. It would be an action by the city to reward those people that are reducing the trash footprint and working to make a difference with waste. With this action the cost for residents will be reduced to half the present small container charge to about \$10.00 for twelve pick ups a year... This is like receiving a reward for making less trash! and being Green!

Sincerely,

Cayute Glaser
