Subject: Variance CHS sept 22

I am emailing objections to the sound level variance for all school mass at CHS field. As a long term resident of the NWAC artist building 1/2 a block away I have to say no to this. Our building houses 52 artists and work from our studios. With a 100db level requested that is not acceptable. Nor am I interested in a religious service of any kind being broadcast through lowertown. That is what their place of worship is for. Perhaps they should seek out places like st. Kate's .

Majority of lowertown is not in favor of this Deborah Huke Sent from my iPhone
