RE: Violation letter dated December 13 for License ID: 20170000913

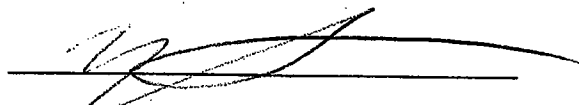

To Whom It May Concern,

This letter is being written in response to the letter from your office dated on December 13 for license violation for Xpert Auto Center.

While I do not contest the facts that there has been occasional regulation lapses I do contest both the fine and the nature of the lapses.

This is an automotive repair shop. By that title and definition there are vehicles constantly coming and going, in addition to vehicles awaiting revival and customers being dropped of or inquiring about repair jobs, you will be hard pressed to find a successful repair facility that had an abundant of vehicles at least once a day. Unlike car dealership where excess vehicles sit until sold; by end of day most vehicles have left our premises. It is because of these unforceable circumstances that I contest the fine.

I would also like to address the council about baseless accusation being made about myself and the conduct of my repair facility that has come to light in recent days. Please feel free to contact me at anytime and the above stated phone number or email. Thank you for your time and cooperation in this matter.

Kamran Hayat, Owner of Xpert Auto Center
