In regards to the overlay project I feel that the city workers didn't fill the patches correctly nor attempt to smooth out the holes, this could have salvaged the road. Also aren't we paying road taxes with our property taxes? We're are struggling through tge costs of inflation and can afford this bill due to worn out plow truck blades that can have been remedied by D.O.T and could have prevented these damages to the roads. I feel that the crews can go out and correct there blotched jobs and correctly fill and smooth out the potholes.current resident of file MO2307.
