Samantha:

I forgot to mention that in the winter my "dip" in the sidewalk becomes a frozen lake when melted, the water can only be removed by using a grain shovel and scooping the water out. It is a ice hazard.

To Samantha Henningson:

You have heard from my neighbor, Shireen Rahnema, who has contacted you to alert you to sidewalks in need of repair. She lives on Hubbard St and I live on the corner of Albert St and Hubbard Ave. My block on Albert St has numerous areas in the sidewalk in need of repair. I have attached a picture showing just my area. I believe the streets were enlarged in this area in the 80's with new trees planted. This is probably the cause of the uneven sidewalks and sunken storm drain. These 2 streets are the ones affected the most from what I found on my walks.

I understand fixing these streets depends on available funds. please add these streets to the list.

Thank you.
