Subject: Today's meeting

Dear Ted and Bonnie-

Good morning.

This is a quick note to let you know that at today's council meeting, I intend to ask my colleagues to lay-over the vote on the local designation question for the former St Andrews church building. While I cannot predict my colleagues' votes today, they are generally open to lay-over motions when requested by the sponsor of the legislation and barring any deadline for which it would interfere.

I'm asking for this brief reprieve to create an opportunity for sides to come together for one last, good faith effort to review and evaluate options for full or partial reuse of the former church building. I have contacted an alternative dispute resolution facilitator to join the conversation, and my office will communicate next steps after the council meeting.

For the sake of all of our invested communities, I encourage sides to participate authentically and fully in this conversation. While there is no guarantee that these conversations will result in a modified outcome, the conversation is at a minimum an act of good faith and a step toward healing the community.

Thanks,
Amy
