This is in reference to the permit for the outdoor seating area. I have a number of reasons for objecting to start with the neighborhood lacks parking to handle the increase in traffic parking enforcement is here almost on a daily basis with one of the other side streets also going permit parking the parking will only get worse also with the bridge closed for rebuilding the patrons parking after the 8pm end of permit parking are making U turns which will greatly increase the danger on the street. Next the area that the out door seating will be on is on a rock shelf that does not permit drainage I know this from personal knowledge as I live across the street from the building. The next point is outdoor cooking that is on the plans will greatly increase the smells (Bad Weather brewing smells bad) dropped food spilled beer will add to the rodent population in the area. Next the noise level on smith is already(when bridge is open) is bad enough with outdoor drinking noise added to it, it will prevent us from being able to op our front windows in warm weather. Last is the extra trash and cig butts collecting around the area this is already a problem but I fear will only get worse with the increase in traffic at Waldman.

Thank You

Richard Haus
