- DITRAC ACTIVE INGREDIENT - DIPHACINONE - EPA# 12455-56
CALL PHYSICIAN IF SWALLOWED - RODENTICIDE - VITAMIN K₁ IS ANTEDOTE

- IF CHECKED - As part of today's service we have inspected each of the bedrooms / sleeping areas in the unit. If the sheets were still on the bed during the inspection you will find the corners of the sheets lifted off the mattress. If bed bugs were observed, we may have needed to remove the sheets to more carefully inspect the underside of the mattress and the box spring. Thank you for your understanding as this is necessary to protect you and our community from pests.

- PLEASE READ CAREFULLY IF CHECKED - Today we observed pests in your home and will be returning for a follow-up treatment. Please watch for your notice regarding your service date and preparation instructions.

NOTICE: Please do not spray any pesticide such as RAID[®]. This will neutralize our products. Please note that you should observe a decline in pest activity over the next several days, however you may still see a few remaining pests for up to two weeks. It may take some time for ALL pests to be affected by our products. If you observe any activity after two weeks, please immediately contact your property manager. Thank you for your help and understanding during this time.
