Subject: Fwd: Donation of Radio Equipment - St Paul EM

The Salvation Army Northern Division Emergency Disaster Services serves Minnesota and North Dakota. In the past we have deployed personnel and equipment New York (9/11), Missouri, Illinois, Wisconsin and most recently to Texas for Hurricane Harvey. In austere conditions we often have little or no communications available. Amateur radio equipment will augment responses and increase volunteer safety.

Subject: Donation of Radio Equipment - St Paul EM

Dear Jim,

Hope this little paragraph will help you in the construction of your letter for the EM - Tim Butler.

It is with great excitement that we look forward to the possible donation of radio equipment .

1 - It would be our plan to use this equipment to help create a mobile command center. We presently have a 17 foot trailer at we are looking forward to outfitting with a good portion of this radio donation. The ability to have this mobile command trailer will not only help us at the point of disaster but also assist when we opportunity out at training events such as the airports exercises, the Patriots North military exercise in WI and other such events where we will have opportunity to test & hone our communication skills with our SATERN Group (ham operators).

2 - Another component of the equipment usage would be to make available for each of our canteen units within the Twin Cities area to have a SATERN person embedded with each of our four canteen crews, allowing for better communications at the point of disaster when cell phone are not accessible.

3 - Theirs use would be when tragedy strikes away from the Twin Cities area, such as hurricanes on the coast or golf, earthquakes, etc.... This would allow for us to set up within the SATERN structure for health and welfare checks for loved ones that would be here in the Twin Cities seeking information concerning ones elsewhere in affected areas.

Thank you for considering us to entrust us with some much needed equipment.

His to Serve,

Major Rae Doliber
Divisional Emergency Disaster Services Director
