

Attention: Jeff Fischbach

Below are responses in regards to Chris and Rob's License Application ID# 20080000717

1. Demonstrate in writing the applicant made a good faith effort to fulfill all petition requirements.
 - a. Owners and managers spent the last 120 days knocking on the potential 31 residential addresses. Of these addresses, nine are owned by someone not living in the home. Letters were mailed with stamped return enveloped, addressed as provided by DSI. Two of the possible 31 are owned by St Paul Housing and Redev Authority and Czech and Slovak MN, should not be considered as they are commercial entities. Of the remaining 17 possible addresses, we received 12 signatures. The final remaining few, they did not answer their door, in multiple attempts, over the past 120 days we attempted to contact them.
2. Demonstrate in writing that the results of the petition attempt showed a favorable disposition from the surrounding community.
 - a. We have attempted to speak with neighbors over the past 120 days. The city notified all properties (residential and commercial) in the area of the hearing held on June 10, 2019. Of those notified, 1 resident voiced concern of area notice level between 7 pm – 11 pm. Our business ceases operation at 9 pm. A second complaint by McDonald Montessori School was removed at the hearing. We also had a letter of support submitted from Banfil Office Court.
 - b. We also have a petition, which was not submitted with the application, containing over 600 signatures from people not directly in the 300-foot mark, all in favorable support of adding the patio.
3. Explanation of how we are going to contain and monitor consumption of beer and wine on the outdoor seating area.
 - a. We are a counter-based restaurant, where food is constantly being delivered to the seating area. Meaning, employees and managers are continually monitoring customers in and around the seating area.
 - b. Our service path requires a few steps on a public sidewalk; therefore, staff will be required to bring beer and wine directly to the customers table.
 - c. We will utilize our outdoor camera to monitor customer movement on the outside seating area.
 - d. We use clear beverage containers which allow us to view what is being consumed by each customer.
