

Hello City of St Paul council;

on Nov 17 i shortly listened in to the city sponsored hearing for residents regarding city services. (I left because the mike did not work) But the comments I heard were so negative that I was surprised. It seems no matter what services residents seek, they are unable to get satisfactory results. I can attest to that matter myself. And crime is out of control, while nobody really does anything about it.....

This increase in crime in this city has been a huge factor and is steadily getting worse. We are paying higher taxes every year and increased fees for all services, but the value of living here continues to decline. Now we could get a little extra help with more police officers on the road !!! But the Mayor needs to explore what are the conditions ??? Do we need to protect crime ? MPLS is helping to control crime and strengthen the police force. What is keeping St Paul from working to enforce rights for its residents and become finally tough on crime???

Please start helping this city to become a more livable place!!! It is MN's capital !!!

Thank you, Regina
