

October 10, 2023

The Midway Chamber of Commerce is supportive of the preliminary plan for United Village Development- RES 23-227. As part of this resolution, a privately-owned public space must also be approved and we therefore are supportive of RES 23-07.

Our Board of Directors was appreciative that two of the first elements of this development are public space- the sculpture park and playground. These are amenities which will be used by neighbors and visitors alike and enhance the beauty of our community. In an urban core with density, green space is even more important.

The party responsible for maintaining this space already has a good record of maintaining other public space. Gold Medal Park is also known for attracting neighbors and visitors, as well as its cleanliness and for being well-kept. We believe the added green spaces to the development will create a cleaner space at what is a very important intersection for the Midway.

Sincerely,

A handwritten signature in blue ink that reads "Chad Kulas".
