You don't often get email from joe.murray@smdsi.com. [Learn why this is important](#)

Think Before You Click: This email originated outside our organization.

Initial email to homeowner about inspector issues July 11

Inspector did not like the fact you are using the basement rooms as bedrooms...but if you install a smoke detector in all 4 bedrooms and send me photos he will approve it for occupancy

photos sent from homeowner July 18

and then final email to city inspector in Oct which finally got the permit closed

to josh.larson, Timothy, jason.brush, bcc: law.office, bcc: armando

Here are the photos of the missing CO and smoke detectors I sent to you on July 18 which were the missing items from the final inspection on July 17 that you and I did together. The homeowner put these up and sent me the photos that same night which you said would be sufficient to close the permit.

Is there anything else that we need to do to close the permit and award the Cert of Occupancy? Since we believed this issue to be resolved back in July, I would appreciate it if you would void the vacant building penalty also.
