August 24, 2011

Dear Inspection Appeals:

My name is John Herbeck, and I own the property at 1722 Grand Ave (M&J Grand LLC.) I have been in the apartment/residential property business full time since 1999. I am a CPA (inactive) and am also a licensed real estate agent. I am taking this inspection (see attached) seriously and would like an opportunity to discuss an extension of time to complete the work.

I only have one thing left from my inspection as I have completed everything else. I have worked closely with Fire Inspector Leanna Shaff, who has been extremely professional, courteous and a joy to work with. Now, I am graciously asking for more time to finish the work identified by the inspection. I had several different contractors' review the project, and I received several conflicting opinions about what was important or recommended, with a huge variation in cost estimates. In addition, we started out the spring with snow being on the ground in April, and a very challenging summer of excessive heat, and unfortunately I did not complete the work within the time allowed. I do have a contractor who is willing to put in writing that the perimeter walls in question are not structural, weight bearing, and that the work can be easily completed next year without any corresponding safety concerns.

I am asking that I get an extension to June 30 of next year, because all of the contractors said that mortar work should not be done in temperatures of less than 40f, and I am worried that I won't be able to get someone prior to the temperatures dropping. I do have someone I trust who could schedule the work for November, but he cannot guarantee it will get done due to the variability of the weather in our area.

Very kind regards,

John Herbeck
