Hi Amy,

I spoke this morning with Department of Inspections, I did not speak with Dan, but I had some other guy on the line, he told me they have the permit, but Brother's electric needs to call them and inform them the work is done, so that they can inspect your work.

Can you please call them, and let me know when they will do the inspections?

Thank you,
Alex

Alex,

I just received a call from the electrical inspector who spoke to zoning, they are allowing my permit to go through. I should have that emailed to us this afternoon or tomorrow morning. You will still need to get together with zoning to get that taken care of. I believe the electrical inspector will be calling you this afternoon.

Hope this information helps you.

Thanks,

Amy Letson
