Subject: Street car study

Hello,

I am writing to express my opposition to spending money on a street car study for W. 7th street. We all know that a study will simply support the foregone conclusion to build the darn thing. You guys have already made up your mind to build it.

This at a time when our streets are in terrible shape. And Major Coleman is begging the state for funds - but we can pay millions for a street car study.

A street car???? Can we please have some sensible leadership in this city?
