#78

To whom it may concern,

Last time I was in court while waiting for my turn I heard several people say they were not notified about the clean up. I thought they're going to think I'm just saying the same thing. Thats kind of what happened. I was told it's like the dog ate my homework. For two years I have had my daughter and her four children with me struggling to survive Water bills of $190.00, pay as much as I can on Xcel energy and still owe $500. If I would of had a warning & would of taken care of the clean up so I wouldn't have another bill. I broke down in court & was embarassed. The judge told me to contact Kay Wickenstein, Social services & get a dumpster & I did. I work days & afternoons and have been picking up & cleaning on it more and really would like to have other housing for them.

I have a loan on my house for landscaping because of water coming into basement which is happening again and may have to look into a sump pump. My daughter was taking care of that when I was working.

I hope you will take some of this into consideration. The daughter living with me has a brain injury and other problems so I am trying to keep a roof over my grandchildren's heads from age 2 to 15 yrs.

Thank you,
Debra Wesley
