Good morning Joanna.

We are making a minor change to our plans to coordinate with mechanical.

My understanding is that the city has approved the work and to move forward your contractor needs to call for the permit and inspection (see attached email from Anca at the city). Did you have a contractor selected?

Regards,

Andy

Date: 07/05/2016 10:50 AM
Subject: Notes on 1209 W 7th

Jason,

This email does not include all of the correspondence we have had but it does give a general indication of the amount of time and effort Wayne has put into your property. The newest notes are first. These notes are typically only used internally so let me know if there is something you want me to explain further.

6-28-2016 - Met with city atty and supervisor wise to discuss enforcement action since work has not been completed. Decision was to revoke the CofO. Made contact with Seth Cryer to explain all work including permits finalled must be completed by July 15, 2016 or vacate the building. Kathy Hammock is no longer employed so Seth advised to send to Jason Bayless who is the director of operations for O'Reilly's. Transferred RF to CofO. WS

5-17-2016 - Rcv'd the encroachment permit for the EFIS from Terri Vasquez. Forwarded to building inspector, Isaac Stensland. There are no permits for the sump-pump discharge. Made contact with architect, Andy Lapalme, who advised that the mechanical division needs to make final measurements inside the basement but can't get down there because the basement is full of water due to the sump-pump failure. Made contact with Chris Wolcott to advise that all work must be completed within 30 days or enforcement action will be taken. WS

4-20-2016 - According to Terri Vasquez (PW) documents for encroachment permit have been sent to O'Reilly earlier this week. She is just waiting for these documents to be signed and returned in order for the encroachment permit to be issued. Made contact with VAA Engineering (Andrew Lapalme) who

advised that drawings for the sump-pump discharge into storm sewer should be completed and submitted to city within 2 weeks. Once the drawings are approved construction should take another 2 weeks. Made contact with O'Reilly representative, Chris Wolcott, and explained the expectation is that these 2 remaining items are resolved within 30 days. I will follow-up in 2 weeks to see if permits are issued. WS

3-15-2016 - I don't see any progress regarding the situations regarding sump-pump discharge and the building overhanging the property lines. Made contact with O'Reilly maintenance division (Chris Wolcott), building inspector (Isaac Stensland), and City of St Paul Public Works Sewer Division (Dan Brady). Chris sent e-mail through Seth Cryer advising that they are waiting on response from City of St Paul to: 1)the engineer's request on sump-pump discharge and 2) no direction has been given them as to the building overhanging the property lines. Dan Brady advised that he no longer handles situations regarding sump-pump discharge into city sewers but referred me to Anca Sima. Dan also forwarded me and Anca copy of e-mail that he received from VAA Engineering (Andrew Lapalme) requesting 2 options to discharge the sump-pump water into the storm sewer. Anca replied to that e-mail and Andrew confirmed receipt of the info and advised the design of the project will be happening very soon. Isaac forwarded me copy of letter he sent to contractor last week regarding the open permits. Isaac forwarded copy of that letter to O'Reilly representatives Chris and Seth. The letter advised them to contact Terri Vasquez in public works division to resolve the situation of the building overhanging the property lines. Isaac clarified by e-mail to Seth and Chris today that they need to contact City of St Paul Public Works representative, David Kuebler (651-356-1569) to resolve the building overhanging the property lines. Isaac's letter gave 30 days to comply. Will follow-up 4-15-2016. WS

3-10-2016 - Performed RF inspection. This issue is being addressed under the in process CofO. O'Reilly store manager is making sure to salt the public sidewalk during periods of freezing temperatures until this is resolved. WS

11-30-2015 - Scheduled consultation 12-3-2015.

11-16-2015 - Dan Reinke has been in contact with Dan Berry at St Paul Public Works regarding tying the sump-pump discharge into the storm sewer. Site survey report should be received mid week. Will follow-up next week. WS

11-3-2015 - All exterior work has been completed. Made contact with bldg inspector, Isaac Stensland, to see if he has final inspection scheduled. Isaac advised he rcv'd complaint that the bldg is over the property lines now because the exterior walls were furred out. He requested a site survey be performed to determine bldg location. General Contractor (Dan Reinke) sent e-mail advising this is scheduled for early next week. Dan is also getting the plumber back out to tie the sump-pump discharge into the roof drain that is routed out the back of the building. This should be completed by end of this week. Will approve with corrections once the sump-pump discharge is resolved. WS

9-10-2015 - Rcv'd correspondence from Dan Reinke. Open plumbing permit has been finalled. There are several open permits for the work that is currently being conducted. All work must be completed by 11-1-2015. WS

9-10-2015 - See comments for 1209. WS

9-2-2015 - Performed re-inspection. The work is in progress but has not been completed yet. Made contact with project coordinator, Dan Reinke 952-226-3090, who was not on site. Dan advised he has

been granted extension by Tom Beach until 11-1-2015. Advised Dan to send me copy of extension and outline timeframe for completion. Will follow-up next week. WS

7-1-2015 - Work has not been completed. Made contact with Seth Cryer who advised he has e-mail indicating that they were granted until 9-1-2015 to complete the parking lot by Tom Beach. Advised Seth to forward me copy of the e-mail. Talked to Tom Beach who provided me a letter dated September 15, 2014 showing work must be completed by September 1, 2015. The other work hinges around the parking lot being completed. Sent revised letter advising all work must be completed by 9-1-2015 or enforcement action will be taken. WS

5-20-2015 - I rcv'd an e-mail from Seth Cryer advising that the work on the parking lot is scheduled to begin on June 1, 2015. I replied back advising that an extension was granted until end of June 2015. If all work including finalised permits are not completed enforcement action will be taken. WS

3-25-2015 - Rcv'd e-mail from Seth Cryer regarding the time frame to complete the parking lot and exterior wall repairs. Work will begin May 1, 2015 and be completed 6-15-2015. I granted an extension until end of June 2015 to get all work done and permit finalised. WS

10-29-2014 - rcv'd phone call from Seth Cryer advising that plans will be submitted to City of St Paul by end of this week. Will follow-up next week. WS

10-10-2014 - The parking lot installation at the rear of the property has been approved through the Zoning Board of Appeals. Building permit needs to be obtained. Made contact with Seth Cryer (417-862-2674 ext 8966) who advised that they plan to complete the parking lot install yet this year. Seth advised that their architect is submitting plans for EFIS to be installed on the exterior of the building and that both projects will be completed at the same time. I advised Seth to contact the architect to see when plans are being submitted and to let me know. Will follow-up next week. WS

8-27-2014 - Rcv'd phone call from O'Reilly representative, Seth Cryer, who advised that there is a zoning board of appeals hearing scheduled for 9-3-2014 for a variance regarding the rear parking lot that they wish to install. Will follow-up after that date. WS

8-5-2014 - Performed re-inspection. All work completed except for the plumbing in the bathroom and the exterior walls. Need to verify the NFPA 704 placard (3-4-2-COR) on the building is correct. WS

6-30-2014 - Met store manager, Eric Shoals, for the inspection. 1 isle is blocked with a gate. The reason for this is because this isle has all the expensive tools. The intent is that customers are forced to walk back by the cash registers. The dead-end isles are allowed to be 50 feet in unsprinklered buildings. This isle is only 27 feet in length. WS

5-12-2014 - Performed re-inspection. Met contractor and building inspector, Dave Tank, at the property. Dave has some corrections that need to be completed before signing off on the open building permit. Exterior wall of 1209 is in need of major work. Contractor has submitted estimate for stucco work. Dave explained that this will need to be done under separate permit. WS

5-8-2014 - Have not rcv'd the e-mail from Seth that I had requested. Still open building permit. Left message for Seth to call me with an update. WS

1-21-2014 - Performed re-inspection. All work has been completed except for the work that has been granted an extension until 5-1-2014 and the open permit for the men's bathroom. Approved the CofO with corrections. WS

5-2-2014 - The open ventilation permit has been finalled, but there is still an open building permit. Made contact with O'Reilly Maintenance Coordinator, Seth Cryer 417-862-2674, ext 8966, who informed me that he rcv'd an e-mail yesterday from his contractor advising all work has been completed except for the second coat of exterior paint on the building. Advised Seth to forward me a copy of the e-mail. Explained that contractor must contact building inspector when completed to schedule the final inspection. Will follow-up next week. WS

1-8-2014 - Performed re-inspection. Work has not been completed. Corrections required for bath vent fan. The vestibule is not completed. Sign required for tenant space 101. Made contact with regional maintenance coordinator, Seth Cryer, to discuss. WS

12-16-2013 - Performed re-inspection. Standing water in basement upon re-inspection. I have rcv'd documentation that drainage tile is being installed around the perimeter of the foundation and a sump-basket. Documentation has been received indicating support posts and exterior wall repair work is being performed under permit. Requested an extension until May 1, 2014 to come into compliance. Advised all other items must be completed within 2 weeks. WS

11-15-2013 - Performed re-inspection. Very few items have been completed. Contractor was on site repairing stair tread and handrail but work was not completed. Access was allowed in tenant space 101. Bath vent fan was installed without permit. Made contact with regional maintenance coordinator, Seth Cryer, to discuss. Sent another letter. WS

11-6-2013 - Rcv'd phone call/e-mail from Oreilly Regional Maintenance Coordinator, Seth Cryer, requesting an extension. Rescheduled for 11-15-2013 at 1:00pm. WS

9-23-2013 - Met Brian at the property. Brian not overly concerned with the damaged structure members. Advised to have the damaged members replaced and footings shored/secured. Brian is not requiring structural engineer report. WS

9-20-2013 - Reviewed with Brian Karpen. Brian wanted to meet at the property. Scheduled for Monday, 9-23-2013 at 11:45am. WS

9-17-2013 - Returned to take photos of the basement. Reviewed with supervisor Wiese who advised that I contact City of St Paul structure engineer, Brian Karpen, to review with him. WS

9-13-2013 - Performed inspection. Elias Salvador, owner of La Limena Market, was the only tenant aware of the inspection. Flory's Beauty Salon was not open so access was not gained to that tenant space. All other tenants allowed access for the inspection. The basement has a history of standing water. Although the basement was free of water upon inspection there are water demarcation lines on walls and structural supports 2-3 feet above the floor. Took some photos but camera malfunctioned so will stop back to get more. WS

Agreed. The concern is how do we get reimbursed if we do the repairs but do not purchase the building. Right now it is not under contract so if we are going to purchase the building we need to get that done. The next question would be at what price should this be under contract? If we are going to do the repairs then it needs to be the purchase price less \$28,600.00. However, if we do not purchase the property (i.e. find something in due diligence that prompts us to terminate the Purchase Contract) then we need some protection for reimbursement of the costs to repair. Do we want that in a lump sum reimbursement? Take it by abating the monthly rent until we recapture the \$28,600? What would the LL agree to? We need to know this so that we can properly address how we will protect that interest of reimbursement ...either with a separate agreement or lease modification.

The repairs need to be made, but the big question would be are we going to keep the same look when we purchase the building. We just need to make sure if we do the repairs and the purchase falls through we would be reimbursed.

Apparently now the bank is considering having us make the repairs and lower the purchase price . See the e-mail below. I know we were hoping the bank would make the repairs, but either way, the repairs need to get completed before the fascia falls off, and we need to get our building signs back up.

Robert and Scott, what are your thoughts?

Thanks, Ed

Good Morning Kathy

Your letter dated 8/8/12 included a brick repair bid in the amount of \$28,600.00 from G.M.Northrup Corporation. In our last conversation we briefly discussed the concept of reducing the price by the amount of the bid. I am following up as to O'Reilly's interest in proceeding along these lines.

Thank you

Bob Clements

Robert

I was asked to get an update on the progress of the bids on our building in St Paul. Any information you can get to me would be appreciated.

Thank you
