

Summary: City of Saint Paul Forestry Activity at 374 Wheeler St. N.

- Call for trimming on 10/13/2010. Landlord at Wheeler St N/St Anthony apartments says the young trees need trimming badly. Inspected on 11/30/2010 and found that the smaller lindens were recently trimmed
- Requested trees trimmed away from building on 12/19/2014 and called again on 12/22/2014 and said squirrels are becoming an issue. Linden trees on Saint Anthony Street side trimmed on 12/23/2015 and 1/13/2015
- Call for inspection on 5/19/2016 reporting fungus on trunk. Inspected on 5/20/2016 and found no evidence of fungus. Likely caused by aphids (insects) dropping honeydew from linden trees. Left note on door.
- Mature elm tree and silver maple on Wheeler Street boulevard pruned on 1/27/15. This was routine block trimming done on Wheeler Street North from St. Anthony Avenue to University Avenue.

This is not an official document or survey.

Comments:

Said there is a fungus growing on the trunk and the tree leaks sap in the spring. Said the trees XF have same issue & apt next to her as well as St. Anthony facing trees.

Post Work Comments:

No evidence of fungus. Likely caused by aphids dropping honeydew from linden trees. Left note on door. KM
