**How will the tot lot replacement schedule be aligned with the facilities assessment? Will tot lots now get grouped in with all other facilities and placed on a new replacement schedule?**

Tot lots will continue to have their regular condition review and safety assessments that will inform the annual priority list. The current strategy is to have the tot lot priority list both be able to stand alone within its own category, as well as be folded into the overall priority list with other identified facility needs in the asset management study for the department. This will allow the department and city to prioritize investment according to need or category.

**What facilities will be upgraded in 2018?**

Parks will request funding for a number of facilities through the competitive Citywide Capital Maintenance program. Funding awards for that program will be finalized in January of 2018. The proposed 2018 capital budget also dedicates an additional \$640,000 in funding to Parks capital maintenance. See list above for potential Parks submissions for next year's capital maintenance programs.
