Re: License Number 20150000267

Dear Legislative Hearing Officer,

Regarding the Application to Add an Entertainment (A) license to Bad Weather Brewery, I have objections, as the noise level from the brewery is already too high.

As it is, patrons ignore or drive over the “Do Not Enter” & “No Left Turn” signs, garbage from the brewery ends up in my yard, and people are loud outside without entertainment to hover around. Adding music outside, amplified or not, will be too loud. Patrons seem to get more rowdy and destructive when there is live music with alcohol, as I’m sure you know.

We also must deal with drunk drivers hitting our cars, yelling in the streets & ally, car alarms going off for hours, and very little parking for actual residents of the neighborhood.

The brewery has already broken promises made in the beginning, I believed Joe when he spoke with us of his intentions and plans, but it’s looking like that may have been a mistake. I want them to succeed, but the cost keeps increasing.

Please do not approve Bad Weather’s application on this issue.

Thank you,
