# Electronic Plan Review-ProjectDox

Software solution transitions a paper plan review process (Building and Zoning Review) to an electronic format

- Greatly simplifies plan submittal process for customers (submit plans and changes 24/7)
- Reduces plan review time (up to 40%), resulting in businesses opening faster
- Identifies life/safety problems early in the process, preventing costly 'post construction' modifications for customer
- Continually provides customer with project status updates
- Eliminates staff coordination of Building/Zoning plan review documents
- Eliminates the need to submit and store paper plans
