Hi Marcia,

My understanding is that his original parking area was 20' X 20' with 8' between the parking area and the property line on the south side (right side of sketch).

It appears that Zoning has approved 4' of pavers added to the south side of the parking area and decreasing the south side setback to 4'.

We are OK with this addition as long as it is pavers and does not expand the existing gravel area.

Please let me know if you need any additional information.

Thanks,
Richard

So is this the diagram he submitted with his plan to extend the parking area and did DSI approve it?
