10/17/2018 4:31 AM	Bruce	For	<p>I'm delighted that Ordinance 18-39 is being rescinded. If and when the petition drive succeeds to have Ordinance 18-40 placed before the voters in a referendum, I hope that the Council will revoke this ordinance as well. Then, working with representative of St. Paul CARTless, I hope that the Council will craft a more balanced approach to any future attempt to adopt any MANDATORY trash collection program in St. Paul. By "balanced", I mean adopting a policy where residential trash fees are in line with what Mpls residents are charged. Also, having an opt-out feature for so-called "zero wasters" who, by their habits, lessen their contribution to the solid waste stream. Also, that neighbors, and those in rental units of up to four units be allowed to share trash cans. Also, that the city forego attempts to tack on "administrative fees" to our property tax bill each year----when residents are paying the haulers directly, and not having the city collect residential trash disposal fees.</p>	+2
10/17/2018 3:40 AM	Meredith	For	<p>When I could choose my own hauler, my cost was \$33/billing cycle. For the exact same size bin and service, I now pay \$78/cycle. If I had an extra \$500 a year, I would not be living in Frogtown! While I support organized hauling in general, this process has been, literally, a trash fire. Why are we paying more for less? It even charges us extra for organics! The petition is sufficient. If you didn't want us to demand a vote on it, you should have studied other organized trash systems and come up with something that works, and doesn't disproportionately affect economically disadvantaged communities.</p>	+3
10/17/2018 1:25 AM	Daniel Brown		<p>The success of this petition effort demonstrates how concerned and frustrated St. Paul residents are with the City's Organized Trash Program. I urge City Council to revise this plan to maintain what is good about it, but listen to concerns that residents have raised, so that we can have a more acceptable plan. Sharing garbage cans is not a crime. It makes sense, and it is economical for many, many residence.</p>	+5

10/15/2018 5:52 AM	Eric Lein	For	A vote to find that "our" petition, with its 5,071 valid signatures, on ORD 18-40 is sufficient will be greatly appreciated.	+9 -1
