

## **St. Paul Regional Water Services Vehicle Accident Summary**

### **1<sup>st</sup> Quarter 2020**

**January - 1**

**February - 1**

**March - 0**

**VA 2020-01 Vadnais 01/09/2020 3:00 p.m.:** Vadnais Laborer was backing the wood-chipper into the Butler Building door #1, which had a low hanging door which needs to be pushed and held up while taller equipment is being parked in the stall. A communication breakdown occurred between the driver and the co-worker responsible for pushing the door up and the top portion of the chipper chute contacted and dented the bottom panel of the garage door, requiring repair of said panel only. There was no damage to the chipper. The garage door is now repaired so that it goes up fully and does not need to be held.

**VA 2020-02 Distribution 02/17/2020 12:57 p.m.:** SPRWS truck #607 was parked inside the traffic pattern at a Distribution project located at 479 Century when vehicle #2 (2019 GMC Savana rental van) drove inside the pattern for an unknown reason and struck and broke the driver's side mirror of #607 with the passenger side mirror of the van. No injuries to either party. The SPRWS garage ordered a replacement the mirror. Driver #2 had no insurance as verified by the State Patrol and was taken to jail on a warrant and their van was towed.
