Hello

I am enquiring about this \$600.74 charge for garbage services from Oct to Dec 2019. I am not sure why I am paying \$200 per month for garage service as this seems incorrect for I just made a payment for \$279 for the last three months.

Moreover, I live in a duplex which is incorrectly classified with city as a Triplex and am working to rectify it. Because of the triplex classificaion, its my understanding that I am being forced to have three garbage bins and three recycling bins. I am a civic minded oerson with a very small waste footprint who composts and I dont need 3 of each such bins. Why would I not get a choice to use the number of bins i need. In any case I am working with the city on classification back to duplex so at least one of the garbage and recycling bins is taken off.

In spite of the above, 600.74 seems high. Can you break this down for me what are the accumulation of charges levelled to bring it to this dollar figure number

Thanks
Rupinder
