Subject: Public Council Hearing Sound Variance 2383 University Apartments
Date: Monday, February 1, 2021 5:58:24 PM

Hello,

I am a citizen residing directly across the street from this construction at 765 Raymond Ave, St Paul, MN 55114. I am writing to have my concerns heard at the council meeting. I DO NOT wish for Ramsey county to grant this sound variance request on behalf of Kraus Anderson Construction. Below is my reasoning:

Our building is one of the most affected by this construction, our walls already shake and vibrate from 7 am - 5 pm and it is a huge nuisance for everyone. I can't imagine how much worse that would be if the sound produced during this construction was any louder than it already is. The building houses apartments as well as several businesses that are in use during the suggested hours. Not only that we have a new born baby in the building and any additional noise will certainly disturb the child and the mother.

If it is absolutely necessary to grant this request by Kraus Anderson I suggest that the window of time they are allowed to make that level of noise should be much smaller and begin later in the day. Specifically I am suggesting they only be allowed to produce the excess noise during the hours of 10 am - 3 pm when they are less likely to disturb the residents and businesses around them.

Sincerely,

Cheyenne January
