**Subject:** 2283 University Ave W VARIANCE  
**Date:** Sunday, February 7, 2021 1:23:47 PM

---

To the City Council of St. Paul,

I am writing about the Noise Source Variance at 2283 University Ave W in St Paul. If there is an existing Noise variance in place for construction in the City I request that it be **put into place to the full extent**. If there is not a noise variance I request that **one be made**. If I had known that 6 story housing was proposed to be built, I would have voted **against it**. I also think that **a notification system needs** to be put into place for residents who live around areas that developers want to use. Similar to the notification I received from the building management where I live that has the notice for this public hearing attached.
