**Subject:** Sound Level Variance Request for 2383 University Ave. W.  
**Date:** Saturday, February 6, 2021 8:03:11 PM

---

Hello,

I am writing to you about the intense noise that has been a product of Kraus Anderson Construction Companies recent apartment building project at 2383 University Ave.

Many many times a loud intense banging and rattling has shaken my apartment at 7am. I live at 2285 University and this noise has intruded my home and sounds like it is just outside my apartment. Goin outside, it is even worse. I cannot walk my dog in that direction when things are so loud. It is impacting not only myself but my dog, partner and all of my neighbors.

I wish to have restrictions on the levels of noise and the time that it occurs. It is currently unacceptable!

Thank you for your consideration.

Casey
