Subject: 2383 Noise Variance
Date: Wednesday, February 10, 2021 6:10:00 AM

Good Morning ,

I'm writing in regards to the noise variance public hearing for 2383 University Avenue. I also wanted to know will there be adequate parking for residents at this new apartment building? In the last few years, there has been an influx of apartment buildings and a decrease of on street parking. I've contacted the transportation committee and several departments over this matter and nothing has been done. Is the City of Saint Paul going to look into this matter and place a "2 hour parking, except by permit only" sign in these areas. I keep hearing that the area between Charles, Hampden and University Avenue is a T3 traditional neighborhood district. Since 2017, there has been 3 new apartment buildings that have been built. I'm not sure what else will it take to change the zoning area for residents who live in this area and can't even find parking. If possible, can you give me additional information on who I can speak with regarding this matter because no one from the St. Anthony Park District have returned my messages.

Thank you
