

I have read through all of the documents available on this project, and have not seen any information regarding sidewalk replacement as part of the package.

When all of the ash trees were removed many years ago on Hamline south of Randolph , we were told that sidewalk sections that were damaged as a result of tree removal would be replaced. That has not happened. Take a walk on the west side of Hamline from Randolph south, and you will see what I mean.

We are investing substantial amounts of money for new bike lanes, new sidewalks where we previously had none, and traffic calming, it only makes sense to repair that which encourages us to get out and walk. These sidewalks are heavily traveled, with three schools in the area and many neighbors using them on a daily basis. I hope that this situation can be addressed as part of this project.

Thank you for your time.
