

RES 20-1263    3/9/2021 8:36 PM    Myisha Holley    Against

passing this resolution would harm the ability of my children's school to provide a quality learning environment and experience for your students, teachers, and community. Charter schools connect and give children the access and supports the they don't receive at traditional public schools. Our children are falling through the cracks with traditional public schools. Charter schools offer services and assistance for families and students. My children are not and have not been bullied by their peers or educators since attending Charter school. They feel protected, safe and free to learn. To vote for this resolution would be detrimental to not just my family but to all the other children and families that trust and know their children are getting more than just a quality education.
