SYNOPSIS:	<p>The Fire Department was called to a report of a porch and house on fire by a passerby. Firefighters arrived to find a large fire on the exterior of a dwelling that was extending into the interior of the structure at the roofline. Occupants of the residence admit to having a plastic smoking receptacle located in the area of origin and a history of discarding cigarettes on the ground. The ignition source was a cigarette butt. The first fuel ignited was plastic. The action that brought these items together was due to improper disposal of smoking materials. The classification of fire cause is accidental.</p>
