Subject: Saint Paul's Minimum parking Requirements.
Date: Friday, July 30, 2021 10:31:58 AM

As a resident of Saint Paul and a Professional Transportation Planner, I want to express my support for the elimination of parking requirements. This is a long time coming. City Government should be continuously seeking to reduce prescriptive approaches to zoning and land use that undermine community goals. By utilizing market approaches we can reduce the negative externalities caused by transportation. E.g. Free, subsidized, and non supply/demand pricing of parking.
