I am totally against restrictions limiting sale of tobacco at gas stations and convenience stores. This policy will definitely affect overall sales and customer service at any gas stations and convenience stores. I am a non smoker, and still against these restrictions. Needless to say, I will be investing in standalone smoke businesses, as they will benefit. And in addition, those that DO smoke will just travel outside of St Paul to get their smokes/and or gas and possibly convenience store groceries. I am not conservative or liberal, I just want people to have a choice.
