Amending Chapter 6 of the Administrative Code regarding the Department of Public Works.

The City Council of the City of Saint Paul Does Ordain:

Section 1.

Sections 6.01 through Sections 6.08 of the Administrative Code are hereby amended to read as follows:

Sec. 6.01. - Department generally.

- (a) Department established. There is hereby established an executive department of the City of Saint Paul to be known as the department of public works. The head of such department shall be the city engineer and director, who, prior to such appointment, shall possess such qualifications as the council may by ordinance provide. ~~The department of public works shall be organized into the divisions of: streets and bridges, traffic and lighting, sewers and utilities, solid waste and energy, equipment services, municipal engineering, real estate, and administration.~~
- (b) ~~Departmental functions. The department of public works shall be responsible for the design, engineering, construction, operation and maintenance of the city's public works projects involving and including all streets, sidewalks, alleys, bridges, sewers, lighting systems, flood-control devices, solid waste collection, disposal and reclamation systems, traffic-control devices, and the coordination of placement of other facilities in the public ways, including gas, electric, steam and water, and property management, including space allocation and communication systems, the coordination of building maintenance, and a system of assessments and valuations.~~
- (b) ~~City engineer and d~~Director powers and duties. The city engineer and director of the department of public works shall be appointed by the mayor with the consent of the council, and shall be in the unclassified service of the city. The city engineer and director shall be accountable to the mayor and,

subject to his/her supervision and control, shall administer the affairs of the department. He/she shall have general authority and control over all departmental staff and shall oversee the proper fulfillment of all tasks and duties assigned to the department. He/she shall have the power to prescribe such rules and regulations as he/she deems necessary or expedient for the proper operation of the department and to that end shall keep himself/herself informed of the latest administrative practices. The city engineer and director shall have the power and the duty to take all personnel actions, including hiring, assigning and reassigning employees, including supervisory personnel, within his/her department and shall supervise their performance.

- (c) The department shall have a designated city engineer. The city engineer shall be a licensed professional engineer and shall hold responsibility for all engineering functions as indicated by state and federal statutes and regulations.

~~Sec. 6.02. - Division of streets and bridges. General responsibilities enumerated~~

- (a) Departmental functions generally. The department of public works shall be responsible for the design, engineering, construction, operation and maintenance of the city's public works projects involving and including all streets, sidewalks, alleys, bridges, sewers, lighting systems, flood-control devices, and the coordination of placement of other facilities in the public ways, including gas, electric, steam and water, and property management including space allocation and communication systems, the coordination of building maintenance, and a system of assessments and valuations.
