- (a) Building types are described and defined in Chapter 5 of the Ford Site Zoning and Public Realm Master Plan.
- (b) A maximum building height of seventy-five (75) feet may be permitted with a minimum ten (10) foot setback from all minimum setback lines for all portions of the building above a height of twenty-five (25) feet.
- (c) All portions of a building above a height of twenty-five (25) feet shall be stepped back a minimum of ten (10) feet from all minimum setback lines. The maximum building height may exceed seventy-five (75) feet, to a maximum of one hundred ten (110) feet, subject to the following conditions:
  - (1) A minimum of one (1) acre of buildable land in the F1, F2, F3, and/or F4 districts shall have been dedicated or conveyed to the city for public use for parks, playgrounds, recreation facilities, trails, or open space, in excess of the amount of land required to be dedicated for parkland at the time of platting. Such dedication of the additional parkland must be consistent with the criteria for parkland dedication in section 69.511, and is subject to city council approval.
  - (2) Maximum developable gross floor area of dedicated land from (c)(1), based on its underlying zoning, may be transferred and added to development allowed in an F4-zoned area, in compliance with other applicable requirements for the district or building, such as FAR, setbacks and open space coverage.

An interior setback is measured from an interior lot line, which is a lot line separating a lot from another lot or lots. A public right-of-way (ROW) setback is measured from a lot line that is not an interior lot line: a lot line separating a lot from a street, alley, or public way.
- (f) Maximum building setback shall apply to at least sixty (60) percent of the building facade along the
