approval of Applicant's historic use variance application based upon the following findings of fact:

1. *The proposed use is compatible with existing uses in the surrounding area and the underlying zoning classifications in the area.* The proposed use is compatible with the existing institutional uses in the immediate area and the commercial uses and zoning south of the parcel along Selby Avenue. The subject parcel is zoned RT2, which provides for civic and institutional uses, along with a range of housing types. The applicant is proposing to use the church in a manner that would be permitted in religious institutions within the RT2 zoning district. There is B2 zoning south of the subject parcel that allows banquet halls as a permitted use.

2. *The proposed use is consistent with the comprehensive plan.* The subject parcel is within an area defined by the comprehensive plan as an established neighborhood. Policy LU-1.7 calls for permitting neighborhood serving businesses compatible with the character of established neighborhoods. The multiple uses proposed are consistent with Policy LU-1.46, which calls supporting compatible mixed-use within single buildings. The historic preservation chapter calls for preserving and protecting historic resources and using historic preservation to further economic development. Policy HP 5.3 calls for realizing the full economic potential of key historic resources.
