Hi there -

I wanted to send an email voicing my support for lighting on Shepard road!

The Shepard Road trails are an important pedestrian corridor and the only trails we have access to without getting in the car and driving somewhere.

I often run and bike commute in the early hours before sunrise. I have taken to wearing a headlamp and carrying a handlight in order to navigate the sidewalks and make sure I stay up right. Without personal lighting, it is impossible to see hazards and other trail users (not to mention the creepy feeling of not knowing who else is out there....)

Lighting would make the trails much more welcoming, especially as we enter the season of limited daylight. It's crucial that we continue to light up our outdoor spaces so folks can commute and recreate safely year round.

THANKS!

Lisa Garretson

Dear Council President Noecker,

As a St. Paul resident who regularly spends time driving and walking on and around Shepard Road, I wanted to write in support of funding streetlight repairs along this important connecting thoroughfare this year. I hope this is something the city will consider a priority as budgets are discussed and finalized. Please feel free to include my comment in the public record.

Thanks for all your work on behalf of the citizens of our city.

Sincerely,

Mary Quinn McCallum

Agree with you on the lighting on Shepard, but what we also need are more police patrols. the speeding and racing of cars and motorcycles is dangerous and constant. Please work with police to spend some time on shepard.

Ms. Noecker:

Please make it a priority to repair the streetlights along much of Shepard Road. As a regular walker, I have curtailed any evening walk along a portion of Shepard Road as the days have become shorter and much of the road is dark. I sincerely appreciate the effort and money that recently went into repairing the lights along the Samuel Morgan Trail after many years of neglect, making it an evening destination.

Subject: Support for Shepherd Road lighting and trees

Think Before You Click: This email originated **outside** our organization.

Hello Councilwoman Noecker:

I do not live in Ward 1, but I do use Shepherd Road to access the downtown area. It's important to me and to the city's economy to strongly resist the corrosion of civic character that creeps in when vandals ruin public spaces. I applaud you for helping replant the trees and for continuing to advocate for additional support.

In addition to supporting the replacement of the 30 lost trees and copper wires in the lighting, I would like to see regular police patrols out there protecting the substantial investment against any additional vandalism. Perhaps a bike patrol may be better able to provide capable guardianship of the area.

I hope that you will be just as protective of the trees along Summit Avenue.

Yours,

Laura

I wanted to respond that I fully support trying to get funding for more lighting on Shepard Road. I live in Lowertown and often travel Shepard Road. As you point out in your newsletter, this is a safety issue; Shepard Road, when unlit, is very dark making it dangerous for cars, pedestrians, bikers, and anyone using that road. I no longer feel safe walking along there after dark.

On an aside, when my husband and I moved to Lowertown 6 years ago, the lighting along Shepard Road was one of those things we always commented on. It was so very lovely, welcoming, and a sign that we were coming home. We have sorely missed those lights.

Thank you for working on this and all the other things you have on your plate. We really appreciate your hard work and we love living here.

Dear Councilmember Noecker,

Hello. My name is Wendy Wyatt; my husband Tom Clasen and I live in Lowertown. We've had the occasion to meet a few times, and we appreciate your advocacy for our neighborhood.

We were absolutely heartbroken to hear about the vandalization of trees along Shepard Road — for the second time no less. We spend significant time walking along the river and were so happy to see young trees planted (and then replanted) along the path last year. And while we understand that this second incident may have happened during the day, we also know that dark pathways (due to street lights that have also been vandalized and are not working) make it easier for people to think that no one is paying attention to this stretch along the river.

We understand that budgets are limited, but we can't give up on downtown St. Paul, and the amount of time some of the street lights have been out — on top of other seemingly neglected projects — (for example, after a water main break on Wall Street in July, we still have a big dirt section in front of our building) make it seem like this is happening. We're writing to request that you do all you can to ensure that money is allocated to repair the street lights along Shepard Road.

Thank you,

Wendy Wyatt

Think Before You Click: This email originated **outside** our organization.

Dear Council President Noecker,

I am writing to express my strong support for funding the restoration of streetlights along Shepard Road. As a nearby Ward 2 resident, I've noticed how dark this corridor has become in recent years, and I share your concern about the safety and appearance of this important part of our city.

Shepard Road connects so many vital parts of Saint Paul — our parks, trails, riverfront, and downtown — yet the lack of lighting makes it feel unsafe and unwelcoming for pedestrians, cyclists, and drivers alike. Reinvesting in this basic infrastructure will not only deter vandalism and crime but also help protect the significant public and volunteer efforts that have gone into beautifying this area.

Please count me among those who support allocating funds to restore and maintain the Shepard Road streetlights as part of this year's budget. I appreciate your leadership and continued attention to this issue.

Thank you for your service to our community!

Sincerely,

Denise Wickiser, Ward 2 Resident

CM Noecker- I support additional funding for security, including enhanced lighting, for Sheperd Rd. But I offer more ideas than just local spending. Such a shame IRRA funds weren't better allocated when available.

As a National Park Recreation Area and part of the Great River Road National Scenic Byway system, our US Senate and Congressional team can add this lighting and security funding need into Highway, Transportation, Interior, and Agriculture direct appropriation requests.

As a critical element of our National Food Supply and Energy corridors, St Paul's stretch of the Mississippi Rv corridor is also eligible for Homeland Security and anti terrorism funds that pass from Fed to State.

As a designated International Migratory Bird Corridor, this area certainly qualifies for intense invasive species removal and lighting enhancements from MN lottery annual funds, some of which are dedicated pass through funds to our Regional Parks. Where's that \$ going???

It seems that the City's 1 cent tax can be focused on this need in 2026 and also become a local match to other state and fed funding sources.

Additionally, the City needs to rethink the traditional lighting aesthetics reflecting the 1920s lattern style. Poles with higher ballasts deter theft, as does reducing overgrown buckthorn where copper thieves live in violation of City camping regulations.

City might also need to rethink pole voltage 24 7...costs less to to run higher voltage than keep restringing copper.

How the Mayors office has been so ineffective on this topic over 8 years is mind boggling. I'd drag each Dept head in to council and demand they have action plan with deliverable dates and funding strategies in place by Dec 2025 mtg.

I also highly recommend the City lobby the legislature to enhance the jail time and penalties for theft or vandalism of public right of ways or other public facilities. At a minimum Gross Misd first offense and escalate to Felony if repeat offender. Destroying assets held in public trust should carry a higher level of deterrence as it infringes on the safety of us all.

Thanks, Brian

This email is in response to your email seeking support for your idea to fund more street lighting along the Shepard Road corridor to prevent repeat incidents of vandalism after more trees were cut down, during the day.

I'm speaking on behalf of my wife as well. Instead of spending money on more street lights that will attract your tacitly promoted and sponsored homeless meth addicts to steal copper, use that money to hire more cops to provide for a much needed greater police presence. Your policies and budgeting have led to the city employing approximately only 500 police officers, when the national benchmark calls for employing 2.4 officer for every 1,000 residents. That means Saint Paul is woefully under-policed to the tune of approximately 200 police officers. Why aren't you sending out emails seeking support to fund more cops?

This city is mismanaged and you are a big part of that problem.

Hi Rebecca,

I read your newsletter and wholeheartedly support ensuring that Shepard Road is well-lit. I also hope that a long-term fix involves a higher use for the area than as a high speed through-way that's hostile to anyone not in a motor vehicle. I occasionally bike along Shepard Road, and there's very little life to be found around the noisy, speeding drivers. As [Bill Lindeke has noted](#), Shepard Road currently takes up a large portion of our city's waterfront, and it's land that other river cities have used to transform their downtowns. Jane Jacobs famously observed that "eyes on the streets" are the best deterrent for crime, and bringing those in is just as important as giving them lights by which to see.

Thanks,

Joe

Hello,

I support funding for street lighting for Shepard Road.

As a runner that frequently runs on the trail along this road, I agree that it is far too dark especially in the stretch of road east of Randolph Avenue until around Eagle Parkway.

I too am frustrated by the desecration of the newly planted trees in this area and I wonder if St Paul police cameras could temporarily be placed in this area.

Thank you,

John Walsh

Hello councilwoman Rebecca,

Really glad that you are urging having lights on ShepherdRoad. There are no lights in many areas and it is very dangerous for driving. I fear for when it will be dark at 4:00 in the Winter for rush hour. When I worked at Johnson HS one of my students was killed on this road at the time of day.

Also, I am very concerned that the bike trail and Lower Landing's wonderful new park have no safe access. Why isn't there safe access from Lowertown to the park and trail system?

Thanks,

Jeanne Hall

Dear Rebecca,

I agree that Shepard Road MUST have good lighting to make it a welcoming entrance to St. Paul. The replacement of copper wire needs to be a priority. AND a solution must be found to repeated wire thefts everywhere. And I JUST came up with the solution! (Like two seconds ago.). (My construction company used to be called Creative Remodeling.). A hinged iron collar could be installed at the base of every light standard. It would then be secured with a hardened steel bolt. Collar thickness, hinge and bolt design would need some tinkering. But if this solution forced thieves to spend five or ten minutes cutting apart a collar it would significantly slow their progress and increase the likelihood of being caught. Right now light poles are almost all made of aluminum with a laughably easy-to-open wiring access panel at the base. This has infuriated me for years.

The county should also pass a law making light pole wire theft a felony punishable by one year in prison per fixture, mandatory! No parole. And this must be imprinted on each iron collar so they see the law as they cut.

Run this by Sean Kershaw. Expensive? Yes, but iron is cheaper than copper and electrician wages.

Mark

Rebecca,

I absolutely agree with you, we can make St. Paul safer by turning the lights on again.

Having said that, I think that the city needs to begin supporting and repairing existing infrastructure. The number of street lights still out on Shepard Road is completely unacceptable. This needs to be prioritized over new projects like the new stairs to the river at the upper landing or the 370 Osborne Park.

In short, fix what's broken, then talk about building new things.

Hi Rebecca,

Thanks for helping with tree planting and focusing on re-lighting Shepard Rd. I live in Upper Landing so would benefit from the lights working. I noticed they're putting lights on the re-constructed bike trail between Lexington Ave and Randolph. Fixing the lights between Randolph and Sibley would be my choice of a stretch to start with. That's a popular waking/ biking route and would also increase lighting in Upper Landing neighborhoods.

Thanks, Paul Thomas

I support funding the repair of the lights along Shepard road. It has been dark too long and think this should be a priority within the next year. Included in the funding should be some upgrades to the poles themselves to make them less susceptible to re-theft - e.g. could the access panels be welded shut & whatever serviceable equipment be moved to the top of the pole, such that maintenance (or theft) would require a cherry picker?

Thanks,

James Daniels

Hello Council President Noecker,

I fully support lighting Shepard Road!

The repeated vandalism of the trees is very sad.

Thanks for running an informative meeting at the Depot!

Take care,

Hi President Noecker,

Thank you for your efforts to promote lighting along Shepard Road. I support this!

And of course thank you for your work to plant trees along Shepard Road also. I am very saddened by the repeated vandalism to the trees!

Sincerely,

Elizabeth Miller

I live on Spring Street in Upper Landing and absolutely totally support funding more lighting for Shephard Road.

And, as I've written about before, it needs lower speed limits and better enforcement. Any enforcement !

Dear Council President Noecker,

Thank you for the update on the new tree vandalism along Shepard Road. Very discouraging and a reminder that the lack of lighting along that stretch of Shepard near downtown (I live in the apartments on Spring St) makes it seem like that is a semi-abandoned stretch of the city, day or night. I drive home down Shepard in the evening often and it's often almost pitch black. It's not safe for drivers, or people on foot along the paths. Vandalism may likely seem relatively easy when a stretch of road like this remains unlighted and seems abandoned by the city.

I know it's difficult dealing effectively with the wire thefts from the light poles, and as a former police dispatcher in a large city, I know SPPD has higher priority stuff to handle every day, but it's one of those thefts that affects the downtown neighborhoods beyond the specific act and seems to remain unaddressed. Full support for any funding initiative within the city gov to address. Thanks! Sharon Carson (resident of the Riverview at Upper Landing apartments)

Hi,

I am writing to voice my support for more lighting along Shepard Road. I do not live in St. Paul, but as a runner, I am often over there with my running group getting in a few training miles, and this stretch of Shepard can feel hostile and unsafe once the sun goes down. More lighting is needed!

I hope that the city of St. Paul can continue to improve this area of riverfront and make it more beautiful and welcoming for residents and visitors alike.

Kind regards,

Lindsey Bryant

Good morning,

I fully support funding street lights on Shepard Road for all the reasons mentioned in Rebecca's email. However, what will STOP the thieves from taking the copper wire again and will it be a loss of money? Is there an alternative to copper?

Also, cameras to catch these people who are destroying our property. It is so senseless.

The riverfront is our GEM in St Paul and has long been underutilized. Cities across the country are embracing their water features, such as rivers and lakes and we need to as well. This not only serves for the enjoyment of the downtown community but attracts tourists, etc.

Raspberry Island with its great covered stage should be hosting concerts regularly throughout the summer.

If there is an opportunity for me to work with the council as a downtown resident to help plan, etc., please let me know.

ALSO, PEDRO PARK IS AMAZING!!!! So I'm looking forward to next summer. This quadrant of downtown will be bursting with activity, community and fun

Thanks Deb Flies

I live near the intersection of Shepard Road and Lexington Avenue. I am very concerned about the lack of lighting on Shepard Road, especially as long, dark winter days arrive.

When I come home from work at 5 pm in the winter, the road is as dark as an unlit country road in a rural area. It is unsafe to drive, given how fast cars drive. It is even more unsafe for walkers and bikers.

I am sickened by the vandalism of trees on the roadway, and the dark environment definitely contributes to this. The darkness leads to further vandalism and theft of copper wire at additional street lights.

Please address this situation. We have to be smarter than the thieves, and -install lights that are vandalism-proof or use materials other than copper wire.

Dear Council Member Noecker,

I just returned to my Lowertown home from a run along Shepard Road. It's a beautiful fall day in one of the city's most traveled areas and I can't help but be disheartened by the repeated vandalism and theft of streetlight wiring. As I am turning 65 and am officially an "old" I have grown to accept that darkness on uneven or snowy pavement is a graver threat to my safety than crime.

Looking ahead to the next round of city budget negotiations I encourage the council to put a high priority on repairing and theft proofing the lighting on Shepard Rd., not only as a safety measure but as an acknowledgement of the economic necessity a welcoming and fully functional streetscape along the river is for any future development of the old West Law and jail sites.

Respectfully,

Toni Wilcox

Hello Councilmember Noecker,

As a resident of Waterford Bay, I have seen what a positive difference the repaired lighting on the Sam Morgan trail from Shepard to downtown has made.

It's time to do the same on Shepard Road. It's a major thoroughfare with its own walking/biking trails which should be lit to make drivers, cyclists and pedestrians feel safe.

Not to mention it would be a deterrent to the riff raff that continues to try and wreck the good things that the city is trying to do (tree planting, etc.).

Thank you,

Jody Hurlbut

Make sure that when streetlight wiring is replaced they use aluminum rather than copper. Also more police patrols in area would be helpful along with neighborhood watch groups

Hello Council President Noecker,

Thank you for your update on Shepard Road. I am so very sorry the trees were damaged, again. It is very disconcerting to know that we have individuals who are so destructive and create such havoc on our beautiful Shepard Road.

In addition, I am so glad to know what to do when I see street lights out as I did coming in from the airport at night a couple of weeks ago - lights were out as I crossed under Highway 62 and came across Highway 5 Bridget into Saint Paul. It was very disconcerting, and a bit scary.

I've just put the "Lights Out" number in my cell, and will call it when I see lights out, and/or it and the police (911) when/if I see vandalism.

Finally, please do all you can to replace/repair the trees and keep Shepard and other streets in Saint Paul lit... it may be funding or in the case of Highway 5 it may be putting pressure on other agencies - whichever it is, you have my support and encouragement!

Kathleen

PLEASE PLEASE PLEASE Get the lights repaired on Shepard Road. It is sooo Unsafe. The bike bath along part of the road was repaved and of all things, they put lights on the path. I don't know of anyone that bikes at night!!! I realize that money may come from some other fund, but we MUST get the lights working on Shepard!!

Thank you

Linda Calvert

Dear Council President Noecker,

A long, dark road is an invitation to vandals and criminals. It then becomes a danger to those who live nearby as well as those who go to the area to recreate.

Though I don't live in Ward 2, I believe it requires funding for streetlight repairs along Shepard Road. I would also support funding for cameras that allow police to monitor stretches of the road.

Yes, I agree, Shepard Road "... deserves to be safe, welcoming, and well-lit."

Thank you for your work.

Sincerely,

Jane Neimeyer

Good evening Council President Noecker,

I just read your email newsletter about the tree vandalism on Shepard Road. This is maddening! I don't know who would go out of their way to vandalize a tree, of all things.

I am absolutely in support in the City of Saint Paul throwing as many resources as possible at fixing the streetlights on Shepard Road — not only to prevent further vandalism, but to promote pedestrian and bicycle safety.

I also hope the copper wiring theft comes to an end. What a headache.

Thanks,

Elizabeth Andrews

Good morning Council President Noecker,

I read about the vandalism of recently planted trees and was disappointed to hear that it was occurring.

I am writing to share that I completely agree with you; proper lighting is needed on Shepard Road as soon as possible to continue bolstering the community safety, tree replanting and other city efforts that you and others have invested their time into.

Thank you for highlighting this issue and continuing to advocate for sustainable vitality in the City of Saint Paul.

CP Noecker-

Thank you for making a point to help restore lighting along Shepard!

I live in Ward 3 on River Road and remember living for quite some time last year without street lights along the boulevard. It made walking along the boulevard feel far less safe and I was disappointed to see Shepard is dark again from 35E to Downtown, making that area ripe for additional potential quality of life issues (thinking here re: tenets of 'broken windows' policing).

With that said, I am supportive of your efforts to identify funding to help remedy this particular instance of darkness along Shepard and also to find a more permanent solution to stop this from happening again in the future.

I am also highly supportive of your efforts to collaborate with the City, State, County, Metro Transit and other local electeds to help develop a plan to transform West 7th and appreciate you offering a 60-day deadline to get back to the community with a plan for next steps (coming out of Dave's 10/27 town hall).

Thanks!

Adam Hertell

Ward 3 Resident

Local District Council Member
