To the St. Paul City Council:

We do not appreciate the noise pollution thrust upon us by the Nativity County Fair. It would be better if any music performances associated with the fair would be held in one of their numerous halls. While they usually have music performance associated with their weekly gatherings, they have fortunately not started holding these meetings in the parking lot.

This means that we would ask you to deny their request for a variance from the sound level limitations. Indeed, we would favor a further limitation of the noise associated with the fair. Forbid any amplification of any fair activity held outside.
