	Electrical Repairs/ Replacement for Code Compliance Site: 947 Fremont, St. Paul, MN	1. Test all electrical outlets and ensure all luminaries (light fixtures) are working properly when power is restored. 2. Properly support/wire exterior luminaire (light fixture) at entry door 3. Remove and/or rewire all illegal, improper or hazardous wiring to current NEC 4. Replace electrical service and wire to current NEC 5. Repair the electrical service grounding conductor to the metallic water piping system. Install a conductor sized to Table 250.66 (NEC) from the electrical service to within 5' of the entrance point of the water service, and bond around the water meter 6. Provide a complete circuit directory at service panels indicating location and use of all circuits. 7. Verify that fuse/circuit breaker amperage matches wire size in panel. Replace improperly sized overcurrent devices.
