Dear Councilmember Johnson,

I understand that my district's councilmember, Sarah Jost, will this week be putting forth a resolution to the council for full clean up of the waste (potentially toxic) of Ford Area C. I encourage you to vote to approve that resolution. Approval will send a strong message that the City of St. Paul insists upon the cleanest possible Mississippi River waterway. St. Paul must demonstrate leadership on this matter. Thank you!

Dear Council Member Anika Bowie,

I'm a 15 year resident up on Selby Avenue. My wife was raised in the East Side. I am committed to a healthy St. Paul and a clean and safe Mississippi River. I am sharing my support of Councilmember Jost's forthcoming resolution for a full Ford Area C cleanup.

We know from monitoring wells that toxic waste is still leaking from this hazardous dumpsite into the river. Yet the MPCA has recommended only a partial cleanup of the site. This approach would fail to address the hazardous waste ensconced in the middle of the pile, focusing instead on removing surface debris and installing some erosion controls that will not even be adequate.

The MPCA claims that they do not have the authority to require Ford to pay for a full cleanup. However, under state Superfund law, the MPCA can hold a polluter fully responsible for permanent, full cleanup.

As a resident of Saint Paul, I implore you to support a full cleanup of Ford Area C. This is the only option that protects not only the future of the river, but also the risk to future taxpayers who may have to clean up Ford's mess if they are not held accountable now.

Thank you.

Sincerely,
Corey Mohan

Dear Council Member Anika Bowie,

I am sharing my support of Councilmember Jost's forthcoming resolution for a full Ford Area C cleanup. Indigenous people are expecting accountability from investors that pollute and are allowed to leave toxic waste when they leave. Port authority allows it from the very first industrial area declared.

We know from monitoring wells that toxic waste is still leaking from this hazardous dumpsite into the river. Yet the MPCA has recommended only a partial cleanup of the site. This approach would fail to address the hazardous waste ensconced in the middle of the pile, focusing instead on removing surface debris and installing some erosion controls that will not even be adequate.

The MPCA claims that they do not have the authority to require Ford to pay for a full cleanup. However, under state Superfund law, the MPCA can hold a polluter fully responsible for permanent, full cleanup.
