

SUBJECT

BOARD RESOLUTION NO. 26-982

Staff is seeking Board approval of a contract for hydrant painting services throughout the City of Saint Paul.

2026 STRATEGIC PLAN GOALS: Asset Management/Infrastructure Preservation

This project supports SPRWS's asset management program by preserving critical distribution system infrastructure and extending the useful life of fire hydrants throughout the City of Saint Paul.

SPRWS staff have identified approximately 700 fire hydrants that require repainting as part of the utility's ongoing maintenance program. The work will restore protective coatings, improve hydrant visibility, enhance system appearance, and help prevent corrosion and deterioration.

Staff have reviewed the proposed scope of work and pricing and recommend proceeding with the contract.
