See attached legal description _____ Lot Area .7322 acres Current Zoning B5

VARIANCE REQUEST: Application is hereby made to the Board of Zoning Appeals (or to the Planning Commission with another zoning application) for variance from the following section(s) of the Zoning Code 65.785
Storage facility exceeding 15% of gross floor area. 85% requested.

SUPPORTING INFORMATION: Explain or demonstrate the following. Attach additional sheets if necessary.

1. Practical difficulties in complying with the provision of the code from which a variance is requested, and that the property would be used in a reasonable manner not permitted by the provision.

SEE ATTACHED

2. The plight of the landowner is due to circumstances unique to the property not created by the landowner.
3. The variance will not permit any use that is not allowed in the zoning district in which the property is located.
4. The variance will not alter the essential character of the surrounding area.

RE: 287 E. 6th Street

Dear Madam or Sir:

On behalf of Global CRES, please find enclosed a Zoning Variance Application for the above referenced property. Also enclosed is the site plan, related documents, survey and \$856.00 filing fee.

I understand that a tentative date for a hearing before the Board of Zoning Appeals is September 30, 2024.

Please process this application in the usual manner. Please contact our office if you need any additional information. Thank you for your consideration.

Very truly yours,

Brian D. Alton

INTRODUCTION:

Global Storage Partners, or an affiliate, is purchasing the property located at 287 East 6th Street and plans to convert most of the area above, and exclusive of, the first floor of the building into a Class A self-storage facility.

APPLICABLE ZONING:

The property is zoned B5 and storage facility rental is a permitted use in the B5 Zoning District. The Applicant is requesting a variance of the limitation of 15% of the gross floor area devoted to storage. The building will remain mixed-use and no storage would be located on the first floor.

Sec. 65.785 - Storage facility, rental.

Standards and conditions in B4—B5 business districts

The facility shall be located within a mixed-use building, shall not exceed fifteen (15) percent of the gross floor area of the building, and shall not be located on the first floor (except for access) or skyway level.

FINDINGS FOR THE VARIANCE:

1. The variance is in harmony with the general purposes and intent of the zoning code.
The use for storage is a permitted use in a B5 zoning district.
2. The variance is consistent with the comprehensive plan.
The Comprehensive Plan supports use of the property for storage.
Comprehensive Plan, Land Use Chapter.
Policy LU-7. Use land use and zoning flexibility to **respond to social, economic, technological, market and environmental changes, conditions and opportunities.**
Policy LU-8. Ensure that zoning and infrastructure support environmentally and **economically efficient, resilient land use development.**
Policy LU-22. Continue to invest in Downtown and promote a **broad mix of uses...**
Policy LU-25. Continue to strengthen Downtown as a residential neighborhood that provides **services and amenities for people of all ages.**
Greater Lowertown Master Plan Summary.
Strategy 3.1. Prioritize building rehabilitation...
Objective 7.3. Investing in the amenities... that sustain values for all residents.

Objective 9.2. Promote the reuse of existing building stock...

Goals 9.5. Welcome and celebrate changes and investments in Lowertown.

3. The applicant has established that there are practical difficulties in complying with the provision, that the property owner proposes to use the property in a reasonable manner not permitted by the provision. Economic considerations alone do not constitute practical difficulties.

Limiting the storage facility to 15% of the building would prevent the conversion and adaptive reuse of this property. The building has several vacancies, and there is not a healthy market for new commercial and office tenants. The building is located in the Lowertown Historic District which prevents alteration of the façade. The building was originally designed and built for grocery warehousing and storage and, as a result, it is not conducive to be used for office or residential.

1. The windows are much higher than a standard office/residential building, and therefore impractical for these uses.
2. There are no windows on one entire side of the building.
3. There are two freight elevators and a loading area.
4. The floor plates are very deep, making office and residential uses unworkable with a building configuration that can't be modified.
5. The basement area is not functional for office and residential uses.
6. There is minimal onsite parking and no way to add additional spaces.

Using up to 85% of the building for storage is a reasonable request that will provide a needed amenity that is in close proximity to the growing residential population in downtown.

4. The plight of the landowner is due to circumstances unique to the property not created by the landowner.

The location and configuration of the building and the existing market conditions that do not support other uses are unique circumstances, not created by the landowner.

5. The variance will not permit any use that is not allowed in the zoning district where the affected land is located.

The use for storage is a permitted use in the B5 zoning district.

6. The variance will not alter the essential character of the surrounding area.

It will not. The area of Lowertown is fully developed. There will not be any changes to the exterior of the building. The use is compatible with other permitted uses in a B5 zone and in the surrounding area.

Think Before You Click: This email originated outside our organization.

David,
Please let me know if you need any additional information regarding the variance application. The Capitol River Council last night voted to recommend approval. I am sure that you will getting a letter from Jon Fure.
I have attached three letters of support for the variance.
Also attached is some information received from Jeff Houge about the Allen Building and a photo showing the height of the windows. Jeff Houge, a real estate broker, states that "Every prospective tenant we walk through the building comment on the windows."

Brian – I’ve attached a few letters of support we received from neighboring/area building owners.

I’m awaiting a couple more, but I wanted to get you the letters I’ve received.

I’ve also included a photo showing the challenge we have with the windows in this building...
Every prospective tenant we walk through the building comment on the windows.

Finally, I’ve attached some historic information on the Allen Building, describing the original construction of the building.

Please feel free to call or email with questions.

Thank you.

33. HISTORIC NAME: J. H. Allen Building
COMMON NAME: Allen Building
ADDRESS: 287 E. 6th Street
ARCHITECT: G. H. Carsley

DATE: 1906-7
SUPPORTIVE

This huge six story brick building was built in 1906-7 as a warehouse for the John H. Allen Company at a cost of \$90,000. It was designed by G. H. Carsley and was constructed by the Louis Brayton Engineering Company, both of St. Paul. John H. Allen was born in Galena, Illinois in 1838 and came to St. Paul in 1864 to join his brother's wholesale grocery business. He served as the head of the firm for many years and was also a director of the National German American Bank of St. Paul. Before moving to this structure, the Allen Company occupied an Italianate style four story brick building at the corner of 3rd (now Kellogg) and Sibley Streets.

The Allen Building is a functional brick warehouse with very little ornamentation other than a corbelled brick cornice, and some decorative brickwork. The windows are divided by brick piers and there is a large loading dock across the facade of the building. It is now used as a warehouse by numerous businesses.

Early on

In 1905 the J. H. Allen Building was a successful wholesale grocery and confectionery manufacturer. They stored a lot of heavy dry goods and wanted a secure, fireproof building for their expanding business. The nearby State Capitol became the example of modern, strong and fire proof construction.

The resulting Allen Building became the first multi-floor, reinforced concrete building in Minnesota. Its Romanesque structure closely resembles the heavy wood buildings at the time with similar spans, large (concrete) beams between the columns, thick 9" concrete floors and red brick. The only wood used was the maple flooring on many of the floors, placed over concrete.

The J.H. Allen Company, though, did not survive the food shortages and wild price swings of the First World War, and by 1920 the building was divided into many smaller tenants. The confectionary business continued in the building until 1965 when finally Pearson Candy left for their present location on West Seventh Street.

Cass Gilbert Society Walking Tour

Cass Gilbert in Lowertown, St. Paul

Allen Building, 287 East 6th Street between Sibley and Broadway

Built in 1906-07, 1910, for J. H. Allen; attributed to Office of Cass Gilbert, architect

This large six-story brick-faced building was constructed in two phases, employing flat-slab concrete floor construction in the first section and mushroom column concrete construction in the addition. George H. Carley, Cass Gilbert's St. Paul office manager, signed the building permit, but he probably did not design it. The unpretentious facades, crowned by a modest corbelled brick cornice, belie the interior structural innovations.

The client, John H. Allen, came to St. Paul in 1864 to join his brother's wholesale grocery business. He was also a director of the National German American Bank. The Allen Company occupied this warehouse building for many years.
