ST. PAUL WATER-ROSELAWN SITE

# Maplewood Comprehensive Plan Future Land Use

# Requested Board Direction

Does the Board wish to direct SPRWS staff to proceed with the following three actions?

1. Initiate land use process with the City of Maplewood to amend the existing Conditional Use Permit at the Sandy Lake site for placement of fill and site grading to satisfy site reclamation requirements of the MPCA based on industrial land fill designation.
2. Submit application for property subdivision and associated zoning designation to subdivide the Rice & Roselawn property and retain property for future construction of a storage facility.
3. Determine fair market value for surplus land at the Rice & Roselawn site. Continue discussions with parties interested in potentially purchasing excess land for consideration by the Board.
