Good Morning,

I am appealing the vacant building designation order under the following grounds.

The last discussion we had with the office was the completion of the work under the permit. At that time the permit was to have been closed. At the last meeting the order was that the electrical permit was another issue, but the building inspector has maintained that the electrical is part of this issue, and refuse to close the existing permit out.

I have reached out to the building inspector and the fire marshal requesting guidance as to what needs to be completed to consider the work to be completed. Your office has been cc'd as of this date no one has responded to my request. The notes has been Bcc'd to the Carlos and to the Mayor's office each time a communication has been sent.

I have not been told what is deficient, but the response I have been getting is that the permit has not been closed. No one has indicated to me what other work needs to be completed apart for the electrical permit.

I have emailed your office the fire marshal and the building inspector copies of a contract for work to be completed, and because of the electrical requirements, I have to open portions of the wall for contractors to get access for them to verify that permit requirements are met, and for them to be able to acquire a permit and inspection of the electrical should it be necessary.

Thank you,

Jaswant Teekasingh

Closure of the Permit 20 24 070504

IMG_0747.jpeg IMG_0748.jpeg IMG_0748.jpeg

Good Morning,

I am trying to understand what is needed to close this current permit. From my understanding from my past discussion with you were as follows:

In my first conversation the only thing you indicated was as follows: The replacement of the sheet rock needed to fire rated, and you needed photos.

When I spoke to you the second time, you indicated that you need to see the screw pattern and the fire rating and photos.

You have not communicated anything else as to what I need to complete and close this permit. The conversation I had with the fire inspector has added more requirements, and he has not indicated what he considers to be complete. Everything is being communicated to me as an after thought.

The last conversation we had, you told me that I needed an electrical permit, because the fixtures were replaced and you saw a photo of an existing electrical plug. I have spoken to several contractors and they all indicated that the work completed in their opinion did not need a permit, but the job was too small that they would have to fit it into their schedule. Until Premier Lighting was able to get a grant to upgrade the lighting in the entire shop.

Premier lighting came and indicated that they will pull the permit verify that everything is up to standards while they are upgrading the entire shop to LED lighting. The owner has been out of town, and I cannot get the information from regarding the time line for the work to be completed.

I had sent an email yesterday and have not gotten a response from you office today. Therefore, I am sending a new note with fewer attachments.

The work which was specified on the original permit has been completed to my understanding. When I went to the Legislative hearing, the hearing officer indicated that the electrical permit was a new thing which I have worked on getting completed.

So my question is: What is holding up the closure of the current permit? If you believe that the work is not completed, can you provide a response as to what you believe I have to do to satisfy the requirements for the permit, so it can be closed.

Because this permit is still open, I stand to loose my certificate of occupancy permit. My expense to do business in the city St. Paul, has been close to \$30,000 thus far this year for fixed cost. I have wasted a lot of my time dealing with on going request to meet the requirements to conduct business.

Therefore a prompt written reply would be greatly appreciated.

Thank you.

Jaswant Teekasingh
