**L Remarks:**

Saint Paul fire crews were called for a report of a building fire. Crews arrived to find heavy smoke and fire on the first and second floors of a 2-story multi-occupancy structure. A restaurant occupied the first floor, and storage occupied the basement and second floor.

Fire crews performed forcible entry, made entry, and attempted to extinguish the fire. Squad 2 encountered high heat, fire, and heavy smoke in the stairwell leading to the second floor. Squad 2's hose line malfunctioned, and the crew backed out. Additional crews attempted to locate basement access.

Water supplies were established. Ladder 22 and Ladder 18 deployed their aerials for use and secured water supplies as well. Heavy smoke became visible from the entire Bravo side at the roofline, as well as just above ground level on the Delta side.

The decision was made to transition to a defensive strategy. All fire companies exited the structure and prepared for defensive operations. PAR was conducted and all crews were accounted for.

Ladder 22 employed their aerial master stream from the B side, into the second floor. A sizeable percentage of the fire was knocked down with the master stream use, and that was shut down.

After conferring with senior command staff, the decision was made to once again make entry with hand lines and conduct final extinguishment of the remaining fire. Ladder 6's crew and Ladder 18's crew made vent/inspection holes in the roof, and determined the roof was not involved in fire....

Full primary narrative can be found in NFIRS 1S - Supplemental

**Primary Narrative:**

Saint Paul fire crews were called for a report of a building fire. Crews arrived to find heavy smoke and fire on the first and second floors of a 2-story multi-occupancy structure. A restaurant occupied the first floor, and storage occupied the basement and second floor.

Fire crews performed forcible entry, made entry, and attempted to extinguish the fire. Squad 2 encountered high heat, fire, and heavy smoke in the stairwell leading to the second floor. Squad 2's hose line malfunctioned, and the crew backed out. Additional crews attempted to locate basement access.

Water supplies were established. Ladder 22 and Ladder 18 deployed their aerials for use and secured water supplies as well. Heavy smoke became visible from the entire Bravo side at the roofline, as well as just above ground level on the Delta side.

The decision was made to transition to a defensive strategy. All fire companies exited the structure and prepared for defensive operations. PAR was conducted and all crews were accounted for.

Ladder 22 employed their aerial master stream from the B side, into the second floor. A sizeable percentage of the fire was knocked down with the master stream use, and that was shut down.

After conferring with senior command staff, the decision was made to once again make entry with hand lines and conduct final extinguishment of the remaining fire. Ladder 6's crew and Ladder 18's crew made vent/inspection holes in the roof, and determined the roof was not involved in fire.

Searches were completed, and negative on all floors. The fire was controlled, overhaul completed, and a final washdown was conducted. Car 20-Fire Investigator Blank completed their investigation. DSI, Board-up, Department of Health, and gas/electric were all notified to respond. Crews were placed back in service and command was terminated.
