

SUBJECT

BOARD RESOLUTION NO. 24-1677

Pertaining to authorizing professional services with American Engineering Testing to provide soil borings for 2025 lead service line replacement project areas.

STRATEGIC PLAN GOALS: Infrastructure Strategy and Performance

American Engineering Testing was awarded master contract No. 4405 by the City of Saint Paul to provide Materials Testing & Subsurface Exploration. The attached scope of work proposed by American Engineering Testing and subject to the terms of master contract No. 4405 will provide SPRWS with soil boring information for SPRWS 2025 lead service line replacement project areas. The tasks of this scope of work include 163 soil borings, compilation of soil boring logs, and patching of the bore holes.

SPRWS staff have negotiated the scope for the project. American Engineering Testing has agreed to provide such services at an estimated cost of \$115,895.00.

Costs for these services qualifies for reimbursement by the Public Facilities Authority under the Master Agreement between the Board and the PFA approved by the Board at its August 20, 2024 meeting.
