12th February 2024

**FAO St. Paul Legislative Hearing Office Re: 1262 Minnehaha Avenue**

To whom it may concern,

Firstly, thank you to everyone who has guided me through this process up to this point. Since taking over the project I could not have asked for better guidance from you all. I will use this letter to outline the schedule, timeline and financing for repairs to be made at the property. All relevant bids are attached to this letter.

**General Contracting - Coda Construction**

Work to start no later than 7 days following the green light for permitting. Estimated timeline for completing the work is 5 days. We are hopeful that given the relatively warm winter we are having, and with more temperate conditions forecast to continue over the next couple of weeks, that we will be able to complete even the exterior repairs within that time frame.

**Electrical - Tim Kunkel Electric**

Work to start no later than 14 days following the green light for permitting. Estimated timeline for completing the work is 1 day.

**HVAC - Stern HVAC**

Work to start no later than 14 days following the green light for permitting. Estimated timeline for completing the work is 2 days.

**Plumbing - Roberts Plumbing**

Work to start the week of 12th February 2024 following the contractors return from vacation. Water heater and supplies are already on site and paid for. Work to be completed within 2 days.

In summary we would hope to have permits closed out by the end of the week of 26th February 2024.

---

## **Financing**

Mr Hermanson, as administered by Grand Realty, collects gross monthly rents of \$35,865 as of today. These funds will be readily available to pay for the costs associated with the work. Our current bids are totalled at \$28,170 with \$2,263 of that total having been pre-paid for the water heater currently on-site.

All of the contractors involved in the project have histories with Grand Realty exceeding 10 years and, in some cases, almost double that. Since our switch to our current software in 2014 I can see that our maintenance spend with these combined vendors is a little over \$460,000. That is separate from the many construction projects we have helped our clients oversee with these same vendors. In short, our relationships in these matters are excellent and longstanding and we have always paid our vendors promptly. In fact, our relationships allow us to complete work more quickly and cost effectively than otherwise might be possible.

## **Taxes and Building security and ongoing condition.**

Past taxes have been cleared and are now current. The property is properly secured and is subject to regular walkthroughs and drive-bys by myself and our team. The property is heated and all utilities are in service with bills paid by Grand Realty.

## **Contractor bids versus inspector estimates.**

As requested I would like to outline why our bid totals are lower than the estimates from the Code Compliance inspection. This summary is a result of my conversations with the contractors and my own observations.

First and foremost we are able to benefit from preferential rates from all of our providers due to the sheer volume of work we provide. As outlined above our long history, often growing alongside the companies we have used, has allowed us to reap the rewards of the relationships we have curated.

Electrical work probably offers us the greatest savings following Tim Kunkel's assessment and bid of the required work at the property.

1. The panel will not need to be replaced or relocated and can be brought to code in its current location.. This is a \$5000 saving in itself. (item 6.)

- 
2. The recommendation is to abandon the power to the garage and remove the existing wiring. This again is a saving of several thousand dollars. (item 3.)
  3. The non-original wiring to be replaced is limited and located in the basement and kitchen. Both of these runs are short and do not require a great deal of time and material to replace. (item 3.)
  4. Overall items 8. and 11. are both at the lower end of what is a broad range of cost.

Plumbing similarly offers us some savings. Primarily I would say this is focused mostly on item 14. which seem to be very limited in scope and, like the electrical work, is fortunately within easy, open access should any replacements need to be made. I would also imagine that at \$2400 our water heater install could be considered a better value due to our relationship with the contractor than otherwise could be achieved.

HVAC we are confident after testing that the Air Conditioning is in proper working order. That is a huge saving versus a potential removal or replacement. Another cost with a huge range would be item 12. After bidding the work it seems this is again a smaller cost than it could be due to the open basement and relatively easy access to rooms for the purpose of running ductwork.

In terms of general contracting we believe the egress window can be repaired versus needing a replacement - this is a \$1000 saving. Overall though the list is composed of many deferred maintenance items rather than whole scale construction projects. The tile floor in the kitchen for example can be patched where it does not meet the standard of item 29.

Every contractor we had bid the work have many years of experience in their respective fields and have brought many projects in for us on, or under, budget. As such I feel extremely confident of their accuracy.

Please do not hesitate to contact me with anything further we can provide for you.

---

Sincerely,

*J. L. Irving*

Proposal	
Name: Hermanson Investments LLC, Eric Hermanson	Date: 1/17/24
Address: 15 Gideons Point Road	Job Address: 1262 Minnehaha Avenue E., SAINT PAUL
City/St/Zip: Tonka Bay, MN 55331	Contact/LB/HN:
Phone: c/o James Irving @ Grand Realty	Project Name/PO:

We Propose hereby to furnish material and labor - complete in accordance with these specifications for the sum of: \$

**Seven Thousand One Hundred Ninety Dollars**

Payable as follows:

**40% due at job start, remainder due in full upon completion.**

All material is guaranteed to be as specified. All work to be completed in a workmanlike manner according to standard practices. Any alteration or deviation from above specifications involving extra costs will be executed only upon written orders, and will become an extra charge over and above the estimate. All agreements contingent upon strikes, accidents or delays are beyond our control. Owner to carry fire, tornado, and other necessary insurance. Line item prices may be listed for reference only, prices are based on job in it's entirety except where noted as options. Standard devices (switches, receptacles etc...) will be installed in included price, dimmers/decora/nonstandard colors or plates are NOT included in price. Any material removed during the course of this job can be salvaged, disposed of or recycled at Tim Kunkel Electric L.L.C.'s **OPTION**. Unless noted fixtures are to be provided by owner.

Contractors Notice to Owner: Any person or company supplying labor or materials for this improvement to your property may file a lien against your property if that person or company is not paid for the contributions. Under Minnesota law, you have the right to pay persons who supplied labor or materials for this improvement directly and deduct this amount from our contract price, or withhold the amounts due from us until 120 days after completion of the improvement unless we give you a lien waiver signed by persons who supplied any labor or materials for the improvement and who gave you timely notice.

Payment must be received by 15<sup>th</sup> day after completion of work. \$150.00 or 10% minimum collection fee on unpaid accounts.

This proposal may be withdrawn if not accepted within 14 days.

Acceptance of Proposal

The above cost, specifications, and project terms are satisfactory and therefore accepted. You are authorized to complete the project as specified. Payment will be made as specified above.
