Note: One billing unit equals 100 cu. ft. or 748 gallons of water.

Billing Periods
Accounts are billed quarterly for residential and monthly for commercial.

Water Rate Settings
Water rates consist of water usage charges, a water service base fee, and a water main replacement surcharge. Water rates are changed periodically to cover increased costs for water treatment, chemicals, electric power, fuel, maintenance of the supply and distribution systems, and other general expenses. Changes in water rates are proposed by resolution of the Board of Water Commissioners and put into effect upon confirmation by the Saint Paul City Council.

Sewer Rate Settings
Sanitary sewer service charges are established annually by the Saint Paul City Council. If you have any questions regarding your sanitary sewer charges, please call:

Saint Paul Public Works
Sewer Division 651-266-6234

Sanitary Sewer Charges consist of a volume charge and a base charge.

Sanitary Sewer Volume Charge: The volume of metered water in billing units multiplied by $5.65.

For single and two-family homes, the volume charge for the first quarterly billing of the year is based on the measured water consumption prorated to a 91-day standard. This will serve as the maximum charge for all other billing periods throughout the year, but the actual amount billed may be lower depending on water usage.

For all other properties, the sewer volume charge is based on metered water for each billing period.

Minimum Volume Charge:
For properties with low or no metered water, minimum volume charges are applied based on the size of the water meter as shown in the table below. The minimum sewer bill is the base charge plus the minimum volume charge.

Sanitary Sewer Base Charge
A sanitary sewer base fee shall be levied and assessed to every property based upon water meter size and shall be applied during every billing cycle, as shown below.

Meter Size	Min Vol Charge	Base Charge	Bill Cycle
< 1"	$7.20	$9.90	per quarter
